# PREFACE

This special issue of Logical Methods in Computer Science contains extended versions of papers presented at the *26th International Conference on Database Theory* (ICDT 2023). ICDT is a major forum for research on all theoretical aspects of data management. ICDT 2023 was held in Ioannina, Greece, from March 28 to March 31, 2023.

This special issue contains five selected papers that were presented at the conference. The articles included in this special issue underwent an additional and thorough reviewing and revision process. They constitute substantially extended and refined versions of the original conference papers. We thank both the authors and the reviewers for the hard work that they have put into this.

Enjoy reading,

Floris Geerts, Brecht Vandevoort
Editors of ICDT 2023 Proceedings
